Saya manual seed drill

Are you looking for a powerful seed drill that plants a variety of seeds in all types of soil, and at the same time is economical and eco-friendly ? Then you have come to the right place ! **The SAYA manual seed drill**, brought to you by SAYA Sarl, is a real all-rounder !

It is suitable for planting maize, nuts, cotton seeds, rice, groundnuts, corn, wheat, beans, soybeans, sunflowers seeds, cow peas, pigeon peas, dhal, white beans, speckled beans and even chickpeas in mountains, hills, and even greenhouses.

The manual seed drill is an efficient and ecological system, as it does not require fuel or electricity; it is all manual work starting with filling the hopper and ending with pushing the machine easily. It covers an area of **2,000 to 3,000 m per hour**, going **3 to 9 cm down**. That is one hectare in 5 hours while respecting the density and increasing production and profitability.

Given that we respect your choices, the manual seed drill offers you the possibility of customising the desired spacing between seeds (see the technical data sheet below).

TECHNICAL DATA SHEET

- **Use :** Seed planting machine
- **Type :** Manual seed drill
- **Application :** Agriculture
- **Energy source :** Hand push man power
- **Working efficiency :** 2000-3000 m / hour. That is, one hectare in 5 hours.
- **Seeding depth :** 3-9 cm.
- **Sowing :** 1-2 adjustable
- **Sowing location :** mountain, hills, vegetable garden, greenhouse, etc...
- **Grain :** Wheat, Rice, Maize, Tubers, Beans, Peanuts, Soybeans, Sunflower seeds, Chickpeas, white beans, speckled beans Cow peas, pigeon peas, dhal, soybeans Corn, cotton seeds, onions, vegetables.
- **6 drilling tips :** Spacing between 26.5 cm
- **7 drilling tips :** Spacing between 22 cm
- **8 drilling tips :** Spacing between 20 cm
- **9 drilling tips :** Spacing between 18.3 cm
- **10 drilling tips :** Spacing between 16.4 cm
- **12 drilling tips :** Spacing between 14 cm
